

SECURE EVENTS BY YNVENTS MEDIA GROUP

WE ARE WORKING TO HELP WITH THE EVENT'S INDUSTRY RECOVERY AFTER COVID-19. HERE IS HOW WE CAN HELP YOU MEET SAFELY AND EFFECTIVELY WHILE STILL FOLLOWING GOVERNMENT GUIDELINES FOR CLEANING ROUTINES, CROWD SIZES AND FACE COVERINGS.

WHAT CAN I DO TO DESIGN A MEETING DURING RECOVERY?

Ynvents Media Group will work with our suppliers, venue partners and meeting planners to ensure that the room layout and associated technology packages will ensure greatest mitigation to risk with maximum impact. Meetings with your teams and clients are still possible, and here is how!

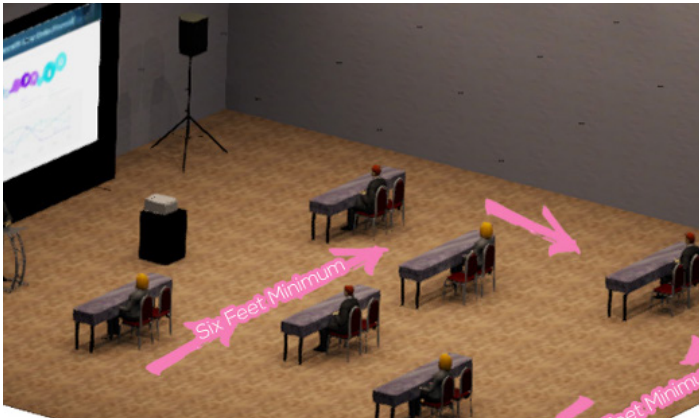

PRESENTATION DISTRIBUTION

Ynvents Media Group will work with your speakers and presenters to obtain, modify and distribute content. This is ideal for ensuring that presentations, keynotes and demos will work flawlessly on any of the below designs. This can be implemented quickly and with a "no contact" objective in mind.

ROOM LAYOUT AND DESIGN

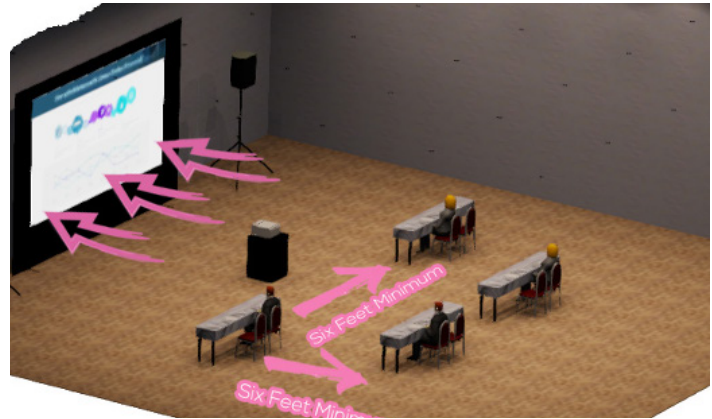

Smaller meetings and remote access are at the forefront of our strategy. Here are some examples of how we can make this work for you.

LOCAL SMALL MEETING DESIGN

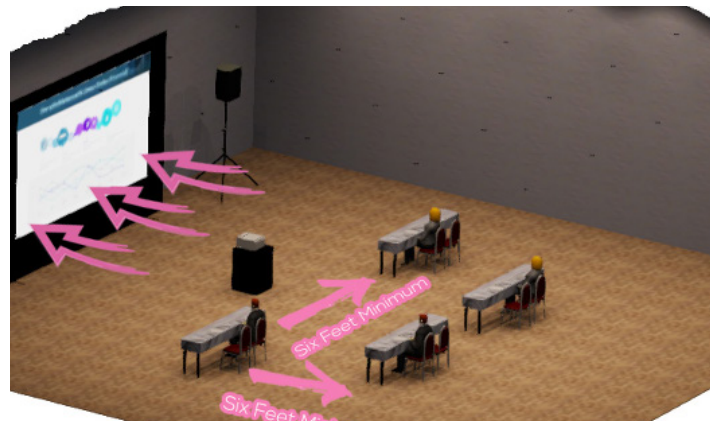

Smaller meetings with fewer people will mitigate risk and comply with CDC guidelines for social distancing. This is the ideal design for a traditional small meeting.

REMOTE VIEWER DESIGN

Similar to the above designs viewers and attendees can be situated into smaller groups across several meetings spaces. A pre recorded presentation can then be delivered via standard event technology methods. Ynvents Media Group will work with you to understand your message goals and help craft a pre-recorded message that would be most effective either at the office, a Ynvents Media Group "Studio Base" location of your choosing or even a message that you have created and wish to have edited for attendee viewing.

LOCAL TO REMOTE DESIGN

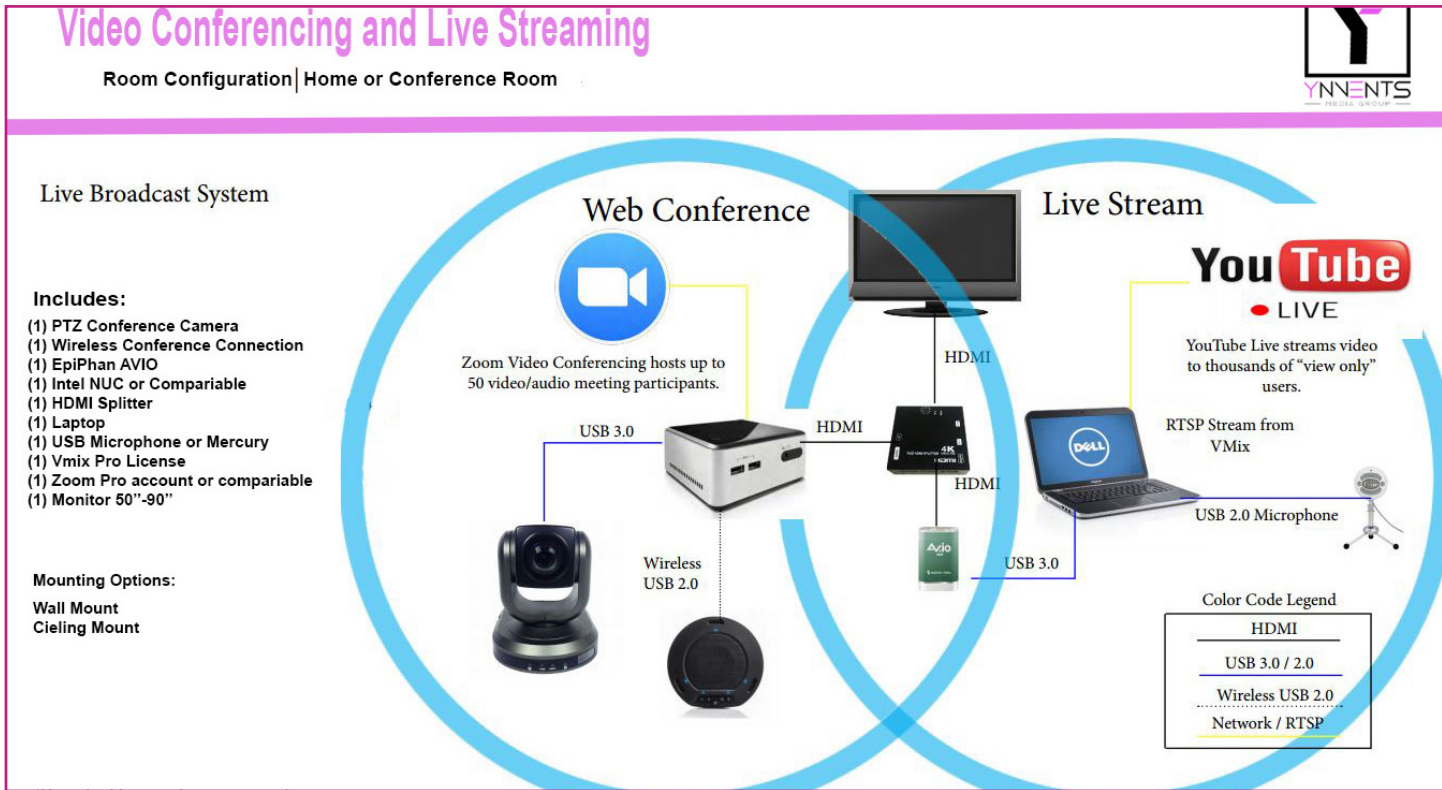

This is the best design for a larger group whether the attendees be at the same venue or safely distributed between meeting spaces at other venues or in their homes. Advancements in streaming capabilities will allow us to set up a "studio base" from which the presentation will be broadcast to remote viewers either in their homes, in other meeting spaces at the same venue or even at other venues. We will manage the streaming platform as well as the logistics at remote locations. This will offer the ideal situation for even setting up cross communications between attendees and presenters back in the "studio base."

ALL OF THESE DESIGNS ARE MODULAR AND CAN WORK IN PARALLEL AT ANY SCALE

ADVANCEMENTS IN STREAMING

Below is an illustration of how Ynvents Media Group can help support your meetings through careful selection of appropriate technologies included streaming devices, projectors, large format screens, web cameras and microphones and much more!

HEALTH CONSIDERATIONS

Our team on the ground will work to ensure that all CDC health guidelines are being strictly followed. These are some steps we will take to ensure that your meeting stays Secure.

FACE MASK COVERINGS FOR ALL YNVENTS MEDIA GROUP EMPLOYEES AND TECHNICIANS.

AVAILABLE HAND SANITIZER AT THE TECH STATION

NO CONTACT POWER POINT AND PRESENTATION DROP OFF
